Academic Projects

Animal Rescue Management System, (Django, HTML, CSS, Database)

- Developed a web-based animal rescue management system as an academic/personal project.
- Implemented user registration and login functionality.
- Developed modules for animal rescue reports, adoption, lost and found, and volunteer participation.
- Built backend functionality using Django and designed responsive web pages using HTML and CSS.
- Performed database operations and managed application data through Django Admin.

Event Management System, (UI/UX Design)

- Designed a user interface concept for an event management system.
- Created wireframes to define the system structure, page layouts, and user interactions.
- Focused on developing a simple, intuitive, and user-friendly interface.

Personal Portfolio Website, (HTML, CSS, GitHub Pages)

- Designed and developed a personal portfolio website to showcase technical skills and projects.
- Created a clean and responsive layout using HTML and CSS.
- Deployed the website using GitHub Pages.
